

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants	David F. Davenport, <i>et al.</i>
Application No. 10/692,063	Filing Date: October 23, 2003
Title of Application:	Method And Composition For Feeding Mammals
Confirmation No. 7269	Art Unit: 1616
Examiner	

Commissioner for Patents
Post Office Box 1450
Alexandria, VA 22313-1450

AFFIDAVIT UNDER 37 C.F.R. §1.132

I, Dr. David F. Davenport, hereby declare and state as follows:

1. I am the CEO of MD's Choice, Inc. the assignee of U.S. Patent Application No. 10/693063 entitled "Method and Composition for Feeding Mammals" (the "'063 Application") and a named inventor to the '063 Application.
2. I have been CEO of MD's Choice, Inc. since November 1998.
3. In late summer of 2001 MD's Choice began development of an enteral nutrition program to treat a horse in critical care condition.
4. In order to test whether the enteral nutrition program was effective to treat a horse in critical condition, it was necessary for MD's Choice to provide the enteral nutrition program to veterinarians and veterinary hospitals treating critically ailing

horses. The ability to test the enteral nutrition program depended on the availability of a critically ailing horse.

5. The first test began on or about August 23, 2001, when MD's Choice provided Lytle Creek Farms Inc. with a 4 part enteral nutrition program to treat an 800 kg gelding. Lytle Creek Farms was provided with amounts of the 4 part program believed to be sufficient to treat the gelding.

6. After providing the enteral nutrition program to the gelding, Lytle Creek Farms reported the results of the treatment to MD's Choice. The results of this treatment are discussed in paragraph [0116] of the Application.

7. This testing was recorded on MD's Choice's invoice shown in Exhibit A. These invoices recorded the recipient of the program, in this case Lytle Creek Farms, the amount provided and instructions accompanying the program. Exhibit A shows that that the balance due by Lytle Creek Farms was zero and that Lytle Creek Farms was not charged for receiving the program. Although the distribution of the enteral nutrition program was recorded on an invoice, this invoice does not represent a sale of the enteral nutrition program. This information was recorded on an invoice because MD's Choice used invoices to track the distribution of the treatment program and provide instructions to the recipient of the treatment program.

8. Other than the invoice in Exhibit A and the papers reporting the results of the test, MD's Choice has not retained any additional documentation regarding the formulation of the enteral nutrition program provided to Lytle Creek Farms.

9. On or about October 12, 2001 MD's Choice performed a second test in which MD's Choice provided University of Tennessee, College of Veterinary Medicine (UTCVM) with a 4 part enteral nutrition program to treat a 6 year old, 100 kg, American Miniature Horse. UTCVM was provided with amounts of the 4 part program believed to be sufficient to treat the horse.

10. After providing the enteral nutrition program to the horse, UTCVM reported the results of the treatment to MD's Choice. The results of this treatment are discussed in paragraph [0115] of the Application and Enteral Feeding of a Hyperlipemic Miniature Horse with a Component Feeding Program, Sommardahl et al., Nutrition in Clinical Practice vol. 17(1) Abstract p. 68-9 Feb. 2002.

11. This testing was recorded on MD's Choice's invoice shown in Exhibit B. As with the invoice for Lytle Creek Farms, these invoice recorded the recipient of the program, the amount provided and instructions accompanying the program. Exhibit B shows that that the balance due by UTCVM was zero and that UTCVM was not charged for receiving the program. Although the distribution of the

enteral nutrition program was recorded on an invoice, this invoice does not represent a sale of the enteral nutrition program. This information was recorded on an invoice because MD's Choice used invoices to track the distribution of the treatment program and provide instructions to the recipient of the treatment program.

12. Other than the invoice in Exhibit B and the papers reporting the results of the test, MD's Choice has not retained any additional documentation regarding the formulation of the enteral nutrition program provided to UTCVM.

13. MD's Choice performed similar tests by providing the enteral nutrition program to Nathan M. Slovis, DVM on or about October 29, 2001, to Dr. Ed Letourneau, DVM on or about November 28, 2001, to Akin Equine Vet Services on or about November 30, 2001, and to Heartland Equine Medical Center on or about November 30, 2001 (Exhibit C). As with the tests referenced above, the recipients of the enteral nutrition program received a sufficient amount to treat a single case, were not charged for the enteral nutrition program and reported the results of the test back to MD's Choice.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on my information and belief are believed to be true; further that the statements were made with the knowledge that willful and false statements and the like so made are punishable by fine or imprisonment, or

Serial No. 10/692,063
Affidavit

both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of my application or any patent issued thereon.
